

FOR IMMEDIATE RELEASE

Delta's Nachtwey Presents at PTC Asia 2013

September 10, 2013 – Battle Ground, WA – Delta Computer Systems, Inc. is pleased to announce that Peter Nachtwey, Delta's President, will deliver a technical presentation at the Power Transmission and Control, PTC Asia in Shanghai, China during October 28-31, 2013. This presentation will be at the Cutting-Edge Technology Seminar on Synchronized High-Precision Motion Control of a 44-Axis Modern Stage with Advanced Programming, Tuning and System Optimization. Highlights feature a real world application at *The House of Dancing Water* in Macau, China, a project that utilized extensive motion controls.

The stage for *The House of Dancing Water* is unique in that it consists of 8 main platforms and 3 entry platforms. The platforms are lowered to be underwater so that divers can change the props on the stage for different scenes. Then the platform is raised into view at different levels depending on the props. Each platform is moved by 4 cylinders approximately 9 meters long and 200 mm in diameter. All the stage platforms had to be precisely controlled so they can be synchronized even when the load on the stage changes or the stage is moving through air or water.

*Peter E. Nachtwey, President
Delta Computer Systems, Inc.*

“We are pleased to exhibit at this trade event and conference with our Delta distributor and solutions provider Beijing Silusheng Automation Systems Integration Co., Ltd. Together, we are bringing the benefits of Delta’s high performance closed-loop hydraulic motion control to more customers in China,” stated Delta CEO, Steve Nylund. This international venue gives OEMs, end users and distributors the opportunity to learn about the latest industrial fluid power technology. “Precise motion control for hydraulic, pneumatic and hybrid applications continues to help improve production and quality for industries worldwide,” Nylund added.

The high performance motion control products that Delta designs, manufactures and markets are used worldwide for hydraulic, pneumatic and electric closed-loop control in a wide array of single and multi-axis applications, including testing, food, energy, automotive, entertainment, plastics, materials, aerospace, metals, forest products and others.

About Delta Computer Systems: For more than 30 years, Delta has supplied motion controllers, color sensors, and other utility and industrial products that enable OEMs & integrators to build better machines. For more information contact Bill Savelle, Delta Computer Systems, or email technicalsales@deltamotion.com. Editor: PTC Asia.
